

Kama Precision Bandsaws
Welcome to the world of accuracy

EV 996 Precision Pulldown KAMA Bandsaw ▣▣

Why should you spend more money for our Italian designed and built Kama Bandsaw than an asian one you can get for a few hundred dollars less? Three reasons:

1. You get accuracy that no other bandsaw in the world comes close to. In fact, a KAMA Bandsaw gives you accuracy rivaling a coldsaw, for about half the money and a lot bigger capacity.
2. Ease of use. The head of our bandsaw pivots to miter, not the vise. You save valuable shop space by setting up your machine against a wall instead of in the middle of the shop floor. No other machine gives you this much cutting capacity in this small a package.
3. The machines are built to take constant, heavy, day in and day out use for years.

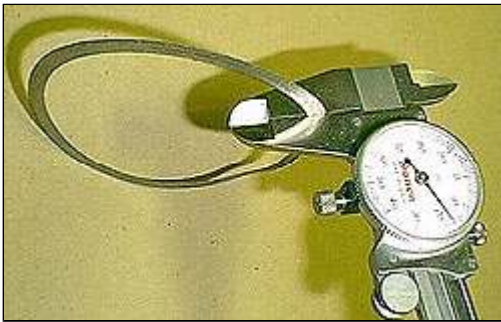

Listed below are photos and examples of what we mean by each of these three reasons. An investment in a KAMA Bandsaw is not an expense, it is a proven money maker that will deliver years of profitable use. In fact, if you think about it, as a percentage of the value of the products you will make, over the life of our saw, the cost of a KAMA Bandsaw is so small, you can't even measure it. Does it really make sense to "save" a few hundred dollars on an asian machine, and go through the hassles of inaccurate cutting, time consuming set up for mitering and running around looking for parts in a year or two?

We have designed and created this powerful KAMA bandsaw with exceptional and innovative technical specifications that are unique to the market. Ongoing research, application and development are the results of many years' experience in the field that is confirmed by thousands of satisfied customers.

EV 996 and EV 97 KAMA Band saws come complete as shown with base, coolant system and control box, ready to use. No hidden extras to buy. On arrival at your shop, only the base needs to be assembled. You will be ready to start sawing in 15 minutes. The machines use standard, 3/4" x .035, bi metal bandsaw blades, easy to find locally or you can buy them from us.

Our experience guarantees a range of KAMA band saws capable of satisfying all cutting requirements in a fast, precise and completely safe manner.

Starting at 90°

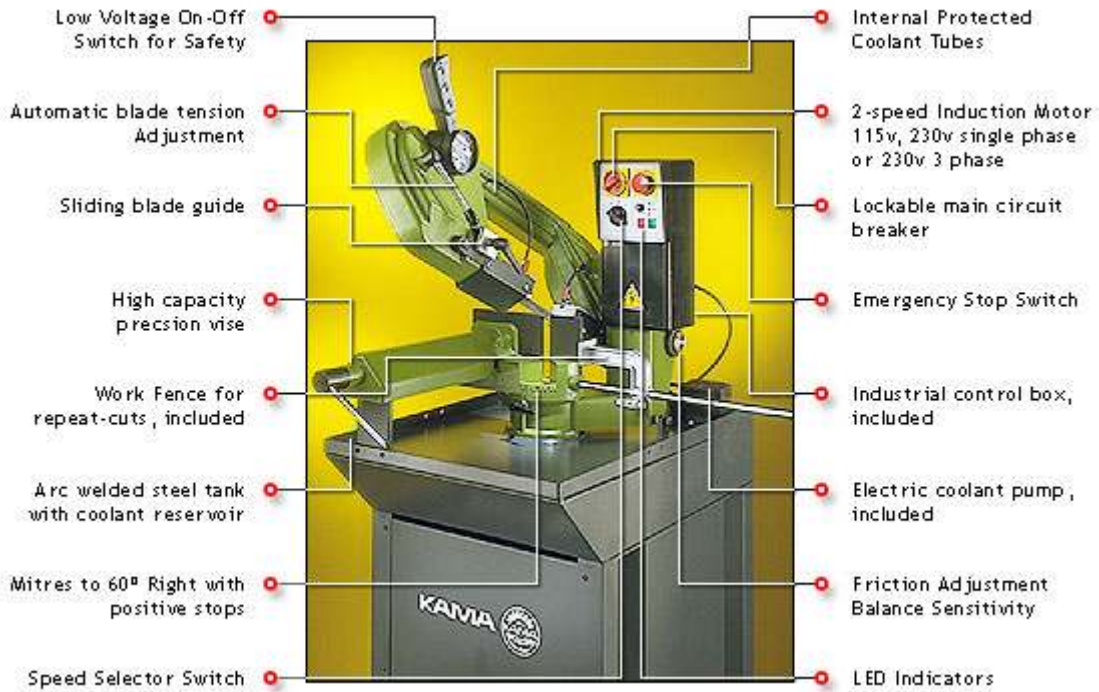

The head swings through to

finish at 60°

On all KAMA Band Saws the head swivels, not the vise. Stock tables stay in one place saving valuable shop floor space.

Features of the EV 996 Series KAMA Bandsaw

Modular Shipping Configuration for Safe Shipping and Quick Assembly.
Size: 22 W x 38 L x 31 H

CUTTING CAPACITIES			
	○	□	▭
0°	6.75	6.75	6.75x5.90
45°	4.93	4.53	4.33x6.75
60°	3.14	2.00	4.00x2.00

Blade Size: 6'3" x 3/4" x 0.035
Blade Speeds:
 LOW: 115 fpm; HIGH: 230 fpm
Weight: 225 lbs
Available Voltages & Horsepower:
 115 V - 0.9 HP
 230 V Single Phase - 1.0 HP

All KAMA Bandsaws come complete with base, cooling system and control box. No hidden extras to buy. When your KAMA Bandsaw arrives you only need to assemble the base and install a plug and you are ready to start cutting.

The Kama Precision Pulldown Bandsaws are available in 3 different voltages:

	Price
EV 996 - 1101 110V	\$ 3195.00
EV 996 - 2301 220V Single Phase	\$ 3095.00
EV 996 - 2303 220V 3-Phase	\$ 3095.00

Leasing Available. Please visit http://www.kooltools.com/lease_application.htm to download Leasing Application Form.

Blade Selection: KAMA Bandsaws come standard with a 6-10 Variable Pitch, bi-metal blade.

Bandsaw Blade Size: 6'3" x 3/4" x 0.035

Shipping charges for the above items are \$13.95 for up to 10 pieces. The prices you will see for these items on the order pages will be inclusive of shipping charges.

In December of 2003 we took a trip around the country to visit customers who had bought Kama Bandsaws beginning in 1997 so we could see how the machines were holding up. Why? Because you want to know how your KAMA Bandsaw will be working for you over the next 6 to 7 years.
